MOBILE USABILITY TEST	P1	P2	P3	P4	P5	P6	TOTAL	POSSIBLE SOLUTIONS & NEXT STEPS
Errors - Record and prioritize most critical errors based on your error classification.								
[Error Rating 4]: When clicking on "multi" - "single" is chosen							**6**	change link in the Prototype
[Error Rating 4]: Favorite hunts are not displayed after going back to "hunts" from a different screen.							**6**	change link in the Prototype
[Error Rating 4]: General menu is missing - edit profile, logout, settings, FAQ, data security etc.							**6**	add menu - perhaps think about using the logo as menu
[Error Rating 4]: When clicking on "single" - playing with kids is already filled.							**6**	change link in the Prototype
[Error Rating 2]: Too many steps while creating a task - reduce screens.							**3**	reduce steps to take to a minimum
[Error Rating 2]: Not clear what happens, if you finish a hunt							**2**	add link to home screen after every finished task
Observations - What are people Doing, Thinking, and Feeling? Use active verbs.								
[1] Icons are very clear, excpet the logo in the upper left and "hunts" icon. Name of app is not displayed anywhere but on the splash screen							**4**	think of how to include the apps name
[2] User would click on the plus sign, even though it's clear that they don't want to start creating a hunt							**3**	make plus sign smaller
[3] User wants to click on the map first							**3**	great! try to convince them to do that
[4] User would like to try the app first, before signing up and see the tutorial before using the app							**6**	add tutorial (think about changing the video to some other tutorial)
[5] Favorites should be displayed on the homescreen as well							**2**	add favorites to the home screen, skip search hunt for that.
[6] "Search hunt" is not needed on the home screen - it's enough to have it in the navigation bar. Better: Display hunts near your with more information							**3**	see above.
[7] Icon for "Find Location" is not clear							**6**	change to Brandenburger Tor, change definition
[8] Log out is not needed as an icon							**4**	skip log out
[9] User would not add an profile picture and "about me" right away							**6**	make it not required
[10] User would like to start with defining the route before adding tasks and start by giving the new hunt a name							**4**	change order of adding tasks/infos to own hunt
[11] User would use drag and drop to search for a starting point for the hunt							**1**	should be possible with including maps
[12] It's not clear if you can combine different categories of tasks. There is no point of scanning a QR Code.							**6**	skip QR Code - no one likes it and it's not sure what to do there anways
[13] "Add tasks" is not clear - only should display a plus sign to add text - only when clicked a text field opens							**1**	think about easier and more convenient solution
[14] Keywords would be helpful to name the tasks - should be saved within creating the tasks							**3**	give the opportunity to name the task while creating it
[15] Conflate adding answers and defining the right one in one step							**5**	reduce steps to take to a minimum
[16] User would like to see how a hunt looks before playing or creating one, User is afraid of clicking "play" without knowing what will happen next							**2**	give more information on what happens when a button is clicked, if needed
[17] User would like to see some "happy" visualization if finished a hunt							**1**	think about it.
[18] "My hunts" is assumed to be part of profile, should be separated in own hunts an favorites							**4**	change my hunts to profile, think about only displaying favorites in the tab bar
[19] Filters for the search function (categories, lenght, time etc.) are needed							**6**	add filters for search
[20] User would like to have the opportunity to look at the map/progress while playing a hunt							**3**	offer a little map to click on to see where you are while playing a hunt
[21] The app should give the user information about using GPS and if there is no signal							**2**	think of notificiations and make sure GPS is working with google maps
[22] Users think there is too much text in the app. Proportions from text/picutres padding should be redesigned.							**4**	skip text, think about taking it shorter and have a look at the proportions
[23] Users are not sure where and how photos are saved. They should be taken through the app directly.							**4**	think about place where photos are saved, make sure that the app has access to the users camera
[24] Sharing in the community should be only one step, there is no need including a preview.							**2**	skip the preview
[25] Users would like to use community as a network, inspiration and for groups. A shortcut to the profile is not needed in the community section.							**3**	think about adding more content to the community
Negative Quotes - Any negative soundbytes? Record them here.								
[1] I don't really know what's meant by the type of tasks - it would be nice to have more information or some examples before choosing."							**2**	add information and examples to each category
[2] I would like to read through more hunts before I decide on one to save in my favourites.							**1**	add more hunts to search for in the search mask
[3] I don't really know what happens if I press "play" - is there more information or do I have to start right away?"							**1**	give more information on what happens when clicking on buttons
[4] The app didn't ask me beforehand how many players should be part of my hunt.							**5**	add opportunity to decide on number of players
[5] There is no information what's the name of the app. (Home Screen)							**5**	add name of the app
[6] I am not sure if I can click on this map.							**2**	make sure users are encouraged to click on the map
[7] The icon for "hunt" is associated very negativley with me.							**3**	change icon for hunts and therefore think about a new logo
[8] I would NEVER upload a picture of me.							**3**	make it not required
[9] This is too late to add the tasks in my opinion - this should be possible before.							**3**	change order of tasks
[10] I don't recognize what this should be - is this a H? (talking about the dumbbell)							**3**	think about changing the icon for physical tasks
[11] It's not clear that I can type in an address to start the hunt from.							**1**	make it clearer in the text/search field
Positive Quotes - Any positive soundbytes? Record them here.								
[1] It's very intuitive.							**4**	
[2] The home screen is very clear and not too filled.							**3**	
[3] Perhaps a running person would be better for the hunt icon. It seems to be more friendly.							**1**	think about changing the logo/icon for hunts
[4] It's very clear what I have to do here. (Sign-Up)							**6**	
[5] Adding your favorite is very easy, the heart is easy to understand.							**3**	
[6] The option of choosing the end of the hunt is great!							**1**	
[7] I like seeing my results - I would love to see the common run of all people who did this hunt, as well.							**5**	add common run to results
[8] I would add the text which describes something as a speech bubble, this could seem more friendly.							**1**	think about displaying text in another way
[9] It's good, that the app shows you, what you have entered in the tasks.							**2**	
[10] I would like to save the photos directly in the app. This way it doesn't take too much space in my gallery.							**2**	
[11] I really like the app - I would try it in real life.							**5**
